

EDLSV - EDLSVB Hidden linear diffusers

Description

Concealed linear diffusers for vmc systems with a 30 mm slot with an aerodynamic aluminium profile and adjustable deflectors for optimal air throw control.

Features

Materiale: alluminium.
Finishing: EDLSV: painted black Ral 9005

Finishing: EDLSVB: painted white Ral 9016
Slot: 30 mm.

Installation: by means of a plenum box with a bridge assembly system. Placement of anti-crack tape on the frame and subsequent plaster skimming.
Dimensions available:
- Lenght 500 mm;
- Lenght 800 mm.

Use

Diffuser suitable for air-supply or return in residential and commercial environments.

Models

-EDLSV - EDLSVB hidden linear diffusers with deflectors (supply) 30 mm slot.

Accessories

- isolated plenum;
- fixing bridges.

Operating data

Data referring a terminal throw velocity $V_t = 0.25$ m/s and with a temperature differential of 10/12°C in ceiling insallation and side air throw.

Operation data concerning to diffuser without damper or with open sliding damper.

Operation data concerning to diffuser with deflectors in working position with 50% reduction of the effective air passage surface.

The position of the deflectors reduce the effective section. When the deflectors are open or in return mode, the air flow (m^3/h) could be increased.

Vk: effective speed (m/s)

m^3/h : air flow

Pa: pressure drop in Pascal

L(m): air throw in meters

dB(A): noise level
