

EVBBN Centrifugal fans for domestic use

Description

Centrifugal fans with forward blades for wall installation complete with overpressure damper and filter. Double speed single-phase motor, IP44, with automatic reset thermal protection and class II insulation. Maximum operating temperature 40 ° C. The models with timer can prolong the operation for a time of 2, 15 or 30 minutes, or for a time proportionate to the use of the fan (automatic timing); in the timed operation the fan is always at low speed. The HT models, in addition to the timer have a hygrostat which, when exceeding the set relative humidity value (between 60% and 90%), automatically switches from low to high speed.

Characteristics

Material : Injected plastic.
 Finish: White.
 Version S: standard model.
 T version: with timer.
 HT versio : model with humidity sensor and timer.
 Power supply 230 V.

Use

Centrifugal fan for air renewal in bathrooms and rooms of average sizes.
 Suitable for wall mounting.

Operating data

dB (A) : noise index.

S : basic model.

T : model with timer.

HT : model with humidity sensor and timer.

Le prestazioni di portata aria riportata nella tabella si riferiscono ad una perdita di carico pari a 0 Pa.
