

Description:

Paper filters for spray booths .

Characteristics:

Filtering partition consisting of a double layer of pleated cardboard with the holes disposed in a boned manner on the two sides. The air filled with paint particles is channeled into the filter through the holes, the specific gravity paint over the air continues inertia the straight stroke accumulating on the filter walls. This type of filter, due to its conformation, has a great capacity for accumulation of paints and allows a long life. Furthermore, the replacement of these types of filters turns out to be practical and fast. Thickness 65 mm.

Operating data

Pa : pressure drop in Pascal

Caratteristiche tecniche e limiti di impiego	
EFFICIENZA gravimetrica media:	45%
EFFICIENZA captazione vernici:	>90%
TEMPERATURA massima di impiego:	180°C
UMIDITÀ relativa:	90%
PERDITA DI CARICO iniziale:	30 Pa
PERDITA DI CARICO finale consigliata:	250 Pa
PERDITA DI CARICO massima:	400 Pa
VELOCITÀ filtrazione consigliata:	0.75 m/s
DIMENSIONI	0,9 m (H) x 10m (L)
