

ETEDU-45 Flexible ducts for industrial applications

Description :

Flexible duct made of 0.45mm thermoplastic sheet (TPE) and inner copper plated steel wire helix. The duct is particularly suitable for suction of aggressive fumes even in the presence of various types of acids, bases and solvents.

Characteristics :

Colour: transparent
Temperature range: from -30°C to +90°C (100°C peaks)

Size:

From diameter 60mm to 400mm standard 10 meters (20 meters roll up to Ø200 on request).
For larger diameters minimum lot 10 meters in size of 5 meters.

Use :

- Aspiration of motor vehicle gas.
- Pneumatic transport, granules aspiration, solvent and acid passage
