

EVTD EVO ECOWATT Centrifugal fan for circular duct

Description

Circular duct fan, with external terminal box, removable casing and adjustable motor, 220-240V 50/60Hz, power supply. Extractable motor/fan.

Characteristics

790 / 5.000
 Risultati della traduzione
 Models with nominal diameter from 100 mm to 315 mm with installation on circular duct.
 Compact, ruggedized white plastic enclosure. Low sound level.
 Hermetic structure sealed between the main body and support bracket, to avoid air leaks. Rubber gaskets on the flanges to improve air tightness with the ducts.
 Silent-block between the engine and the support to reduce vibrations and lower the noise generated.
 EC brushless motors:
 Speed adjustable to 100% by means of the potentiometer placed in the terminal board or by means of an external control type REB-ECOWATT.
 Remote control option via external 0-10V signal.
 - Ball bearings and manual reset thermal protector.
 - Working temperature: -20 / 40°C. Degree of protection IP44.

Use

On circular ducting up to \varnothing 315 mm.
 Maximum flow rate from 200 to 2650 m³ / h depending on the model.
 Static pressure up to 560 Pa.

Accessories on request

- Suction mouth net;
- Fitting for rectangular ducts;
- Non-return damper;
- Speed regulators.

Dimensions

all measurements are in mm

Ease of installation and maintenance

To reverse the flow of air, simply rotate the central body by detaching it from the brackets. The rotation of the central body is also useful for positioning the terminal block in the best possible way, so as to obtain a better access position.
