

ESCI-C circular iris regulation dampers

Description

Circular iris regulation dampers for air flow regulation with differential pressure test connections to calculate the flow rate.

Characteristics

Material: galvanised steel structure and blades
 Regulation is obtained using a handle located on the damper, which changes the opening diameter of the damping hole.
 Tightness class C in accordance with the EN 1751 Standard.
 Operating temperature from -10 to +80°C.

On request

Stainless steel version.

ESCI-C 80

ESCI-C 100-800

Dimensions

all dimensions are expressed in mm

model ESCI-C	ØA	ØC	B	D	kg
80	79	125	115	35	0,5
100	99	165	115	30	0,6
125	124	188	115	30	0,7
150	149	230	115	30	1,0
160	159	230	115	30	1,0
200	199	285	120	30	1,4
250	249	335	135	40	2,0
300	299	405	140	40	2,6
315	314	405	140	40	2,6
400	399	525	150	55	6,5
500	499	655	150	52	9,0
630	629	815	160	60	16,0
800	799	1015	290	120	25,0

Flow rates and price list

* within the min-max range, accurate regulation is achieved without affecting the noise
